EPA Region 6 Summary – Sunday, August 9

In New Mexico, EPA has a team of two federal on-scene coordinators, two water quality experts and ten technicians and contractors responding to the spill as it reaches communities in the state. Yesterday, EPA collected water quality samples from nine locations in the river near intakes for Aztec, Farmington, Lower Valley Water Users Association, Morning Star Water Supply System and the North Star Water User Association. Each of these locations will continue to be monitored as the spill makes its way past these areas. In the San Juan River, the spill is moving at about 2.5 miles per hour and as of 3 pm yesterday it had reached Nenahnezad, NM, approximately 9 miles west of Farmington. EPA's Mobile Command Post will arrive in Farmington later today.

Subject: FW: Update - R9 GKM Response

FYI, this is the Region 9 update. In addition, we know that there will be an emergency declaration signing event with President Begay and other senior Navajo officials today at 1 p.m. in Window Rock. The declaration will cover the entire San Juan River. There will be another emergency declaration signing event later in the afternoon at the Shiprock Chapter House. They would like to host another public mtg today or tomorrow in Shiprock to provide a general update to the

community, review highlights of water sampling data and what those results mean for residents, and provide the opportunity for the community to ask questions.

Subject: Update - R9 GKM Response

Hi all - Here is the latest from R9.

Thanks-

Kelly

Region 9 Background

The discharge has moved quickly and is in the vicinity of the Navajo Nation boundary, near

Kirtland, NM. Navajo officials have reacted quickly, assessing their well fields and drinking and irrigation water intake systems and issuing a precautionary "do not use" public service announcement regarding water from potentially impacted sources. Region 9 held a conference call today with Navajo Nation EPA (NNEPA) and Navajo Department of Public Safety.

The Navajo EPA surface water monitoring program (Shiprock Office) collected water and sediment samples from the San Juan River yesterday - prior to the spill impact. Region 9 provided 2 START contractors and 4 additional personnel are en route to coordinate and conduct increased sample collection and lab analysis in conjunction with NNEPA.

A Region 9 OSC will report to Farmington on Monday to assist. A joint EPA/NNEPA river sampling program has commenced focusing on the San Juan between Shiprock/Hogback, NM area and Mexican Hat, UT and will continue for the foreseeable future. NNEPA also requested drinking water sampling support immediately for Navajo operated water intakes. NNEPA and USEPA drinking water experts agreed to inventory and assess water sources including private wells and intakes.

STAFFING

Farmington

Two Community Involvement Coordinators (CICs) are deploying to Farmington on Sunday. The CICs will plan to meet with local Navajo Chapter officials and prepare to host public meetings in the coming days. The CICs will partner with NNEPA and NN Department of Public Safety to ensure comprehensive outreach to all affected Navajo Chapters.

1 R9 OSC arriving Monday, 2 more arriving Wednesday

Durango

1 OSC is in the Durango Incident Command Post to coordinate Navajo field activity updates and results with Region 8. Preparing the R9/R6 incident action plan and staffing the IMT.

The Region has also deployed a Public Information Officer (PIO) to participate in a Joint Information Center (JIC), presently in Durango.
